

**Ioanna Kyriakou (PhD)** is Assistant Professor at the Medical Physics Laboratory, Department of Medicine of the University of Ioannina, Greece. She has obtained her BSc in Physics at the University of Ioannina, Greece and her PhD at Lancaster University, UK. Her research interests include the development of particle transport functionalities in the Geant4 Monte Carlo simulation code and applications to radiobiology, radiation protection (including space radiation), and radiation therapy. She is a member of the Geant4 collaboration (coordinated by CERN) and member of the Steering Committee of the Geant4-DNA collaboration (and «Physics» activity leader). She is Associate Editor in Medical Physics (AAPM), Physica Medica (ELSEVIER), and Frontiers in Physics (Radiation Detectors and Imaging section), as well as member of the Editorial Board of Applied Sciences (MDPI, Applied Physics section). She has published so far 78 papers in peer-review international journals with more than 4400 citations and 37 h-index (GoogleScholar).
