

**Dr. George K. Matsopoulos** received his Diploma in Electrical Engineering in 1988 from the National Technical University of Athens. He received his M.Sc. in 1989 from the Bioengineering Unit, University of Strathclyde, U.K with thesis title “Location of the femur in Above-Knee Amputee wearing Quadrilateral and Ischial Containment Socket using Ultrasound”. He received his Ph.D. in Bioengineering Unit in 1993 from the University of Strathclyde, U.K. with thesis title “Application of Morphology to Medical Image Processing”. He is currently Professor at the School of Electrical and Computer Engineering of the National Technical University of Athens. He is the Director of “Biomedical Engineering Laboratory” at the School of Electrical and Computer Engineering. His research interests include signal processing, image processing, 2-D and 3-D registration and fusion, biosignal processing, optimization techniques, decision support systems and artificial intelligence in medicine, telemedical and computer vision applications, and hospital information systems. He has published over 300 papers in international scientific journals, chapters in books, and in international and national conference proceedings.
